CorePass® NFPA1006 Tower Rescue Awareness

7023:2024

Generated At: Monday, August 25, 2025

IQF Level	3	IQF Credit	2
Approved References	CMC Rope Rescue Technician Manual (6th Edition) The Essential Technical Rescue Field Operations Guide (6th ed. 2024, Pendley) Fire Service Technical Search & Rescue (8th ed. IFSTA) NFPA 1006:2021		
Special Notes	It is recommended that candidates have completed CorePass® Height Safety I prior to assessment.		

Describe the use of ladders and elevated devices for tower victim transfer 702324D01

Performance	Describe the use of ladders and elevated devices for tower victim transfer
Standards	In accordance with approved references
Conditions	
Comments	Ladders include ground and aerial ladders.

Recall the phases and their respective key actions for tower rescue 702324D02

Performance	Recall the phases and their respective key actions for tower rescue
Standards	In accordance with approved references, covering size-up, pre-rescue, rescue and termination phases.
Conditions	Given a fictitious or case study tower rescue scenario.
Comments	Must include information gathering techniques, basic search criteria, location of victims, identification and interviewing of witnesses and/or reporting parties.

Recognize the potential hazards associated with tower rescues. 702324D03

Performance	Recognize the potential hazards associated with confined spaces.
Standards	In accordance with approved references and local regulatory requirements.
Conditions	
Comments	Must include but not limited to radio frequency, electrical, height, environmental exposure.

Outline resource capabilities and limitations for tower rescue operations 702324D04

Performance	Outline resource capabilities and limitations for tower rescue operations
Standards	In accordance with approved references
Conditions	
Comments	

Describe methods for controlling access to a tower rescue scene		702324D05
Performance	Describe methods for controlling access to a tower rescue scene	
Standards	In accordance with approved references	
Conditions		
Comments		
Explain the elements of an incident action plan for tower rescue		702324D06
Performance	Explain the elements of an incident action plan for tower rescue	
Standards	In accordance with approved references	
Conditions		
Comments	May also conform to local Incident Command System requirements (i.e. GSB, ISO, AIIIMS, CIMS, ICS etc) Must include additional resource identification and activation procedure.	
Identify hazard control strategies for tower rescue incidents.		702324D07
Performance	Identify hazard control strategies for tower rescue incidents.	
Standards	In accordance with approved references and local regulatory requirements.	
Conditions	Given identified hazards.	
Comments	Must include scene control barriers, PPE, isolation protocols (devices, procedures), communications.	
Identify operational protocols and forms specific for tower rescue.		702324D08
Performance	Identify operational protocols and forms specific for tower rescue.	
Standards	In accordance with approved references and organizational doctrine.	
Conditions		
Comments		
Participate in a tower rescue to transfer victim to an elevated device.		702324D09
Performance	Participate in a tower rescue to transfer victim to an elevated device.	
Standards	In accordance with approved references, organisational doctrine and local regulatory requirements.	
Conditions	Given an incident not requiring the rescuer to be solely supported by the tower.	
Comments	Where height safety equipment is required to be used, the candidate must be approved to operate such equipment.	
Perform a size-up of a tower rescue incident.		702324D10
Performance	Perform a size-up of a tower rescue incident, including victim location, risk/benefit analysis and resource assessment.	
Standards	In accordance with approved references and organizational doctrine.	
Conditions	Given a simulated incident (observation) or case study (i.e. video/photos).	
Comments		
Implement isolation procedures for identified hazards at a tower rescue incident.		702324D11
Performance	Implement isolation procedures for identified hazards at a tower rescue incident.	
Standards	In accordance with approved references and organizational doctrine.	
Conditions	Given a simulated incident (observation), isolation procedures and equipment.	
Comments	Includes electrical/RF isolation and securing scene using barriers/tape.	

Performance	Work as part of a team to support a tower rescue incident and complete incident action plan tasking.
Standards	In accordance with approved references, organizational doctrine, and local incident management structure.
Conditions	Given a simulated incident with operations or technician level team on-scene, with tasking prescribed within the incident action plan.
Comments	Must include reporting task progress status to a supervisor or incident commander/controller.
