--	------------------

Performance	Identify scene hazards and don and doff PPE to prevent disease transmission in remote settings.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Assess responsiveness and breathing, and activate help appropriately for wilderness contexts.	707125D02
--	------------------

Performance	Assess responsiveness and breathing, and activate help appropriately for wilderness contexts.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Demonstrate CPR and integrate AED awareness for remote decision-making.	707125D03
--	------------------

Performance	Demonstrate CPR and integrate AED awareness for remote decision-making.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Real-time chest compression devices should be used to give feedback to candidates (recommended but not mandatory).

Manage unconscious patient.	707125D04
------------------------------------	------------------

Performance	Manage unconscious patient.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: infant, child, adult.

Provide choking care across age groups and transition to CPR when unresponsive.	707125D05
--	------------------

Performance	Provide choking care across age groups and transition to CPR when unresponsive.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: infant, child, adult.

Control external bleeding using direct pressure and dressings.	707125D06
---	------------------

Performance	Control external bleeding using direct pressure and dressings.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Apply a manufactured tourniquet correctly when direct pressure fails for limb haemorrhage.	707125D07
---	------------------

Performance	Apply a manufactured tourniquet correctly when direct pressure fails for limb haemorrhage.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Apply an improvised tourniquet correctly when indicated and commercial devices are unavailable.	707125D08
--	------------------

Performance	Apply an improvised tourniquet correctly when indicated and commercial devices are unavailable.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Bandage common wounds using cravat, spiral, and figure-eight techniques to secure dressings.	707125D09
---	------------------

Performance	Bandage common wounds using cravat, spiral, and figure-eight techniques to secure dressings.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Perform manual techniques clear obstruction from choking patient.		707125D10
Performance	Perform manual techniques clear obstruction from choking patient.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments	Range: infant, child, adult, escalating approach (cough, back blows, abdominal thrusts).	
Recognise and manage shock with positioning, warmth, and monitoring until evacuation.		707125D11
Performance	Recognise and manage shock with positioning, warmth, and monitoring until evacuation.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments		
Use an epinephrine auto-injector safely and monitor for response and evacuation need.		707125D13
Performance	Use an epinephrine auto-injector safely and monitor for response and evacuation need.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and auto-injector trainer.	
Comments		
Perform a full primary and secondary assessment and document.		707225D01
Performance	Perform a full primary and secondary assessment and document.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments	Use SOAP note format or similar.	
Identify medical identification tags and integrate findings into assessment and plan.		707225D02
Performance	Identify medical identification tags and integrate findings into assessment and plan.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments		
Explain legal and consent considerations for first aid in remote locations.		707225D03
Performance	Explain legal and consent considerations for first aid in remote locations.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments		
Control external and internal bleeding indicators and prioritise interventions.		707225D04
Performance	Control external and internal bleeding indicators and prioritise interventions.	
Standards	In accordance with approved references and organisational doctrine.	
Conditions	Given wilderness first aid scenario and resources specified in approved references.	
Comments		

Pack wounds and secure with pressure bandaging.	707225D05
--	------------------

Performance	Pack wounds and secure with pressure bandaging.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: must include, but not limited to hemostatic bandage.

Manage burns with cooling, covering, and evacuation criteria.	707225D06
--	------------------

Performance	Manage burns with cooling, covering, and evacuation criteria.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Recognise and manage shock progression and position appropriately.	707225D07
---	------------------

Performance	Recognise and manage shock progression and position appropriately.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Perform treatment for musculoskeletal injuries and monitor neurovascular status.	707225D08
---	------------------

Performance	Perform treatment for musculoskeletal injuries and monitor neurovascular status.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: may include, but are not limited to: RICE, PEACE & LOVE

Apply slings and swathes for upper limb and clavicle injuries.	707225D09
---	------------------

Performance	Apply slings and swathes for upper limb and clavicle injuries.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Screen for head and spine injury using responsive checks and motor/sensory testing.	707225D10
--	------------------

Performance	Screen for head and spine injury using responsive checks and motor/sensory testing.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Recognise chest and abdominal injury red flags and prioritise evacuation.	707225D11
--	------------------

Performance	Recognise chest and abdominal injury red flags and prioritise evacuation.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Recognise and manage hypoglycaemia and identify when hyperglycaemia is suspected.	707225D12
--	------------------

Performance	Recognise and manage hypoglycaemia and identify when hyperglycaemia is suspected.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Recognise hyperthermia, apply field cooling and evacuation triggers.	707225D13
---	------------------

Performance	Recognise hyperthermia, apply field cooling and evacuation triggers.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: heat cramps, heat exhaustion, heat stroke.

Recognise hypothermia and frostbite, apply field rewarming and protection.	707225D14
---	------------------

Performance	Recognise hypothermia and frostbite, apply field rewarming and protection.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	

Determine evacuation urgency and draft a basic evacuation plan.	707225D15
--	------------------

Performance	Determine evacuation urgency and draft a basic evacuation plan.
Standards	In accordance with approved references and organisational doctrine.
Conditions	Given wilderness first aid scenario and resources specified in approved references.
Comments	Range: must include, but not limited to communications, location, contingency, roles.
